

Note for students : dear students, I have sent to you 3 lectures before this one.

- 1) Review of vowels and consonants (this is just a revision of the most important information learnt in the first year); therefore it s not part of the syllabus of second year.**
- 2) The first lecture should be “introduction to phonology”**
- 3) The second lecture is “the syllable”**
- 4) The third lecture is the structure of the English syllable**

What is required from you is to read everything and prepare your questions for the meetings.

It s preferable for you to print the lectures; I don’t want you to come hands in pockets without anything in your schoolbags. Reading the text in a mobile is not enough.

As you know, we will meet three times in this semester (one hour in each meeting) the time won’t be enough for us to go through all points given to you in the lectures; therefore,

For the first meeting, we will discuss the most important elements in lectures 1+2

For the second meeting, we shall look at what is important in lectures 3+4

The last meeting will be devoted to lectures 5+6

Important:

You read the lectures and try to help yourselves to understand using dictionaries, books, internet and if you can do that with your friends, it is better.

Don’t forget that you are students at the university, and you are responsible.

I want you to prepare precise questions in order not to waste time

Feel free to send your questions at anytime via this email:
